BOSCH

Bosch e-Retailer

Manage orders and delivery with a powerful digital platform.

Overview

Bosch e-Retailer has revolutionized the global economy, shaping new consumer behaviors and business strategies. Bosch e-Retailer application with it's user-friendly platform prioritizes security, reliability and innovation.

We aim to offer our comprehensive Bosch e-Retailer suite of application (Buyer, Seller, Delivery Partner and Admin Portal) to market segments experiencing challenges such as limited reach, reduced sales opportunities and higher operational costs due to the absence of an online sales channel.

Key Features

User-friendly interface

Feedback and reviews

Diverse product catalog

Order tracking

Featured businesses and promotions

Secure payment options

BOSCH

Seller App

Inventory Management

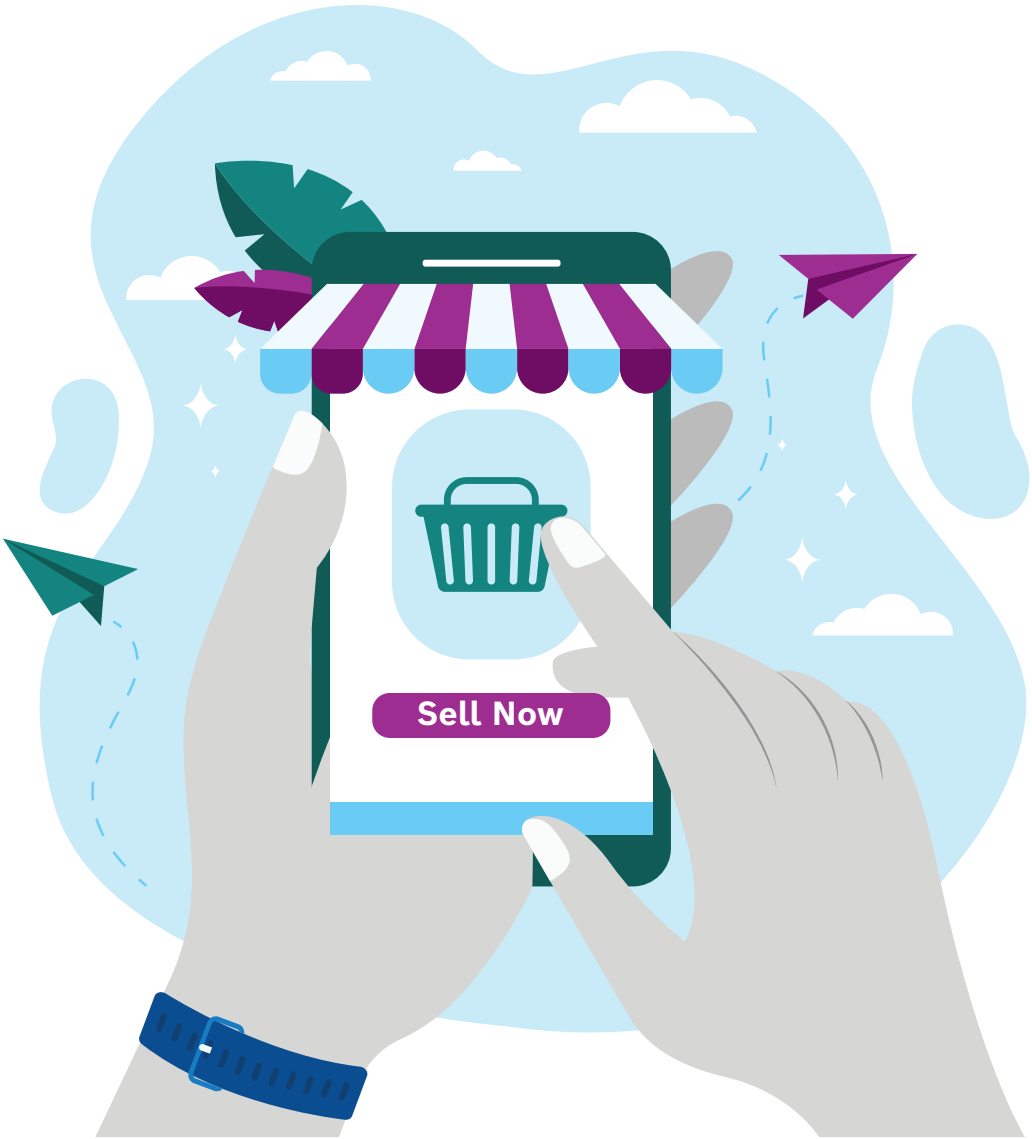

Organize and update product listings with tools for bulk uploads to ensuring that your inventory is always up-to-date and easily accessible to customers.

Product Cataloging

Creating customized product catalogue with product description, pricing, videos or images and offer specifications if any. It help customers search and filter products based on their preferences.

Marketing Tools

Promotional capabilities such as discounts, coupons and targeted campaigns. These campaigns can be configured and customized by the seller in their admin portal.

Buyer App

Enhanced user navigation and experience

The ease and convenience of browsing, adding items to the cart and placing orders within a few clicks making the application a user-friendly and efficient tool for customers.

Secure payment options

Integration with trusted payment gateways to ensure safe and convenient transactions.

Order tracking

Real-time updates on order status and delivery ETA to keep buyers informed every step of the way.

BOSCH

Delivery Partner App

Order Assignment

Efficiently allocate delivery tasks using automated systems that consider factors like proximity, availability, and workload, ensuring optimal utilization of resources.

Route Optimization

Utilize GPS navigation and real-time traffic updates to optimize delivery routes, minimizing transit times and enhancing efficiency.

Performance Tracking

Track key metrics such as the number of deliveries, accuracy, total earnings, and customer feedback. This data allows for continuous evaluation and improvement of delivery operations.

BOSCH

Why Choose Us?

Few challenges that application aims to solve by enabling separate app interfaces aid companies in streamlining workflow management for different user types. Geographical confinement of the store's products makes it challenging to expand into broader customer segments. Moreover, Customers today seek convenience through this application with desired stores being available at their fingertips.

1

Buyer App

Effortless browsing & order management

2

Seller App

Efficient storefront management & analytics

3

Delivery Partner App

Seamless coordination for timely deliveries

4

Admin Portal

Centralized control & comprehensive analytics
